Alaska: The Wildlife CD-ROM

Interactive Multimedia

WINDOWS

MAC

An adventure that takes you to one of the most amazing places on this planet. Whether you head to the treetops for a peek inside a bald eagle's nest or wade through a river for a nose to nose encounter with a grizzly bear, you'll have a chance to see, hear and read all about the animals and areas that you choose to explore. Includes 80+ QuickTime movies, more than 300 color pictures, maps and educational information.

Alaska: The Wildlife.....$39.95

BSDisc CD-ROM

2-CD Set

UNIX

Includes both NetBSD & FreeBSD unix-clone implementations. FreeBSD runs on 386/486/Pentium machines, while NetBSD supports a wide variety of architecture's. Both systems are based on Berkeley 4.4 BSD-Lite and are supplied in source and binary form with install notes and scripts. Both systems include X-Windows and TCP/IP networking support, including Client & Server NFS. Also includes lots of GNUware/Freeware packages, both in source and binary form for development tools, communications, games, graphics, editors, mail tools, news, shells, X11 applications, and lots of utilities.

BSDisc $35.00

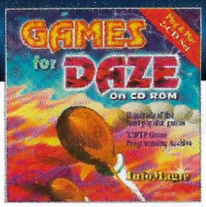
Delphi Tools CD-ROM

WINDOWS

A collection of complete samples and components for the Borland Delphi Programming Language. Samples include code to access Lotus and Excel spreadsheet files, utilize the CTL3D DLL, and perform different types of animation (pallette, sprite, etc). The components included are small samples that can be incorporated into your own applications to add extra functionality. Miscellaneous utilities included assist with creating help files, annotating your sources and adding assorted other features to your applications.

Documentation including comparisons with Visual Basic and FAQ's is also included along with public patches from Borland.

Delphi Tools $35.00



Games for Daze CD-ROM

DOS

Plug & Play! Hundreds of popular games plus the X2FTP Game Programming Archive! The best of both worlds! Hundreds of only the best and most popular games currently available from both commercial publishers and shareware authors, plus the first and ONLY authorized release of the X2FTP archive on CD-ROM! Learn how to program your own games with an archive full of tools and sample programs!

2-CD Set

Popular games from the major publishers include:

- Lemmings 3D
- Dark Forces
- Heretic
- Blackthorne
- Wing Commander3
- and still more!
- Magic Carpet
- Putt-Putt
- Doom
- Gazillionaire
- RAPTOR
- SimCity 2000
- Alone in the Dark
- Cyberia
- XCOM2
- Terminal Velocity

Games for Daze $20.00

Hobbes OS/2 CD-ROM

OS/2

Since the release of OS/2 the Hobbes archive has been the premier archive for shareware, commercial demos, games, utilities, ports of UNIX utilities and IBM provided fixes and updates. By special arrangement we are able to offer the complete archive on CD-ROM. All of the applications are uncompressed. A native OS/2 (Warp) interface has been customized to provide easy file access. In addition to utilities and aps, an extensive collection of FAQ's are provided covering programming, performance tuning and hardware support. The IBM Red Book's are also provided. This CD set is the only complete version of the Hobbes archive!

InfoMagic Workgroup Server

The InfoMagic Workgroup Server provides high-performance file and printing services to PC and Macintosh clients using the Linux operating system. It is the first Linux distribution designed specifically for servers. Based on networking software created by the Internet community and already in use at hundreds of companies, universities and organizations worldwide, the Workgroup Server provides simple graphical tools for system administration and set-up. A Unix novice can set up a sophisticated server environment in a couple of hours. The InfoMagic Workgroup Server includes Linux's well-known support for Internet services, enabling a single machine to provide World Wide Web, email, and Internet connectivity (TCP/IP routing, PPP and SLIP dial-up) services while simultaneously acting as a PC and Macintosh server.

Features include:

- Cross-platform Capability
- User and group management
- Disc and file system management
- Printer queue management
- PC sharing services configuration
- Graphical file system backup
- Macintosh sharing services
- Built-in Internet TCP/IP Services
- Graphical Administration Tools
- Flexible Set-up
- Network configuration
- Software management
- Startup control panel
- Directory browser
- World Wide Web server
- Internet email
- Full Internet routing
- Proven Software

The InfoMagic Workgroup Server combines all of these components in a tested package which is easy to install and administer! The Workgroup Server is based on software which is already in use at hundreds of sites worldwide that run Linux, "netatalk" AppleTalk packages and the "samba" PC networking package.

JAVA CD-ROM

WINDOWS
UNIX
LINUX
MAC

JAVA is the hottest thing to hit the WWW since Netscape went public! JAVA is the new application development language from SUN Microsystems designed specifically for networked applications. JAVA is the first language to enable development of cross-platform networked software for the Internet, meaning it can be used on all platforms such as Windows, Macintosh or Unix. JAVA is used to write software for stand-alone applications that run directly on a desktop machine or as applets. Applets are miniature applications used over the Web in a Java-enabled browser, such as Netscape that allow images or Web documents to be automatically launched or downloaded when their pages are displayed. JAVA allows you add animation sequences, database front-end, client server applications, dynamic pages and forms and even interactive games! Includes the Java Development Kit from SUN Microsystems for Windows NT, Windows95, MAC, Sparc Solaris and Linux. This JDK kit also includes a number of sample applets. The HotJAVA browser for Windows 95 and Windows NT and Solaris. Demo "applets" demonstrating animation, sound, graphics and different kinds of user interface programming. This CD includes everything you need to develop & debug JAVA scripts. On-line documentation is included to be viewed with your favorite WWW browser directly from the CD.

LINUX

Linux Toolbox

Linux is a powerful Unix-like operating system that can run on the average personal computer. It is a multi-user, multi-tasking UNIX clone for 386/486 PC's and higher. It includes full TCP/IP networking support, including ftp, telnet, NFS, PPP, SLIP, etc. Linux can co-exist with other operating systems, such as MS-DOS, Microsoft Windows, or OS/2 on a partitioned hard drive and includes a boot loader that supports direct boot from multiple partitions. Configurations can range from as little as 40 MB or up to 200 MB if running X-Windows. InfoMagic has put together the perfect package for LINUX beginners with complete materials to install, run and learn Linux by bundling our popular CD-ROM release with a comprehensive manual to walk users through setup & installation. The Linux ToolBox comes with the following contents:

- **Linux Developer's Resource CD-ROM.** The most complete CD-Set available for LINUX. This CD-ROM set includes the Linux archives from tsx-11.mit.edu & sunsite.unc.edu along with the complete GNU source archive from prep.ai.mit.edu. Includes the following releases: Slackware, JE (includes JF - Japanese FAQ's), RedHat, XFree86 (X-Windows), Debian, Kernel sources. Demos include: BRU, Smartware, Pathfinder, dBMan, Cockpit, Flagship. Includes a "QuickStart" booklet for setup plus, on-line documentation from the Linux Documentation Project, the "Installation & Getting Started Guide" by Matt Welsh, and the "Network Administrators Guide".
- **"Running Linux"** written by Matt Welsh & Lar Kaufman. This manual covers installation and a complete array of topics covering all aspects of Linux. This definitive guide to installing and using Linux is written for both beginner and advanced users. Chapters include an introduction to Linux, history, software features, design philosophy, hardware requirements & sources for other documentation. A chapter on System Administration gives the basics of system maintenance from booting to backup, including filesystem management to emergency recovery procedures. The Advanced Features chapter describes the X-Window System GUI, networking with TCP/IP and UUCP, electronic mail and Usenet news. Includes numerous appendices for sources of Linux info, distribution & mail order lists, FTP tutorials & site lists, Linux BBS lists and the GNU General Public License.
- **Linux Journal.** Includes a coupon to recieve one complimentary issue of The Linux Journal, the only publication dedicated entirely to Linux. You'll find programming tips and valuable resources as well as good advice for both beginners and advanced programmers!

Linux Toolbox $45.00

Top quality 100% Cotton T-shirts (made by ONEITA). Front has the InfoMagic "ELFOS" character with LINUX in big bold letters. On the back: "LINUX: The Operating System with an Attitude". Sizes: M, L, XL, XXL.

Linux T-Shirt **$15.00**

Mesa Verde CD-ROM

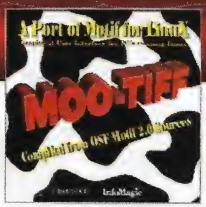
WINDOWS

MAC

Interactive Multimedia

This National Park is located near the 4-Corners National Monument, in Southwestern Colorado. In the late 1800s, a rancher named Wetherill, stumbled across a significant ancient Indian ruin on the large Mesa. Since then, we have discovered over 4000 archeological sites, more than 400 are the larger cliff dwellings. These ancient people are commonly referred to as the "Anasazi" or "Ancestral Puebloan". This vast population flourished while Rome was crumbling, and then mysteriously vanished around 1100 AD. Why did they leave? Where did they go? How did they live? The answer to these questions lie only in the abandoned structures left behind. The "Trails of Time" interactive demo included on the CD introduces you to the park, and shows you some examples of how Archaeologists are working to solve these perplexing puzzles. This CD contains over 100 stunning photographs in PICT format, and is usable on both Windows and Macintosh computers.

Mesa Verde Photo CD **$15.00**



Moo-Tiff (for Linux) CD-ROM

LINUX

Finally! An affordable version of the popular 100% OSF/MOTIF-compatible Graphical User Interface for PC's running LINUX! Includes complete runtime and development environment, provides everything needed to run mwm and develop 100% OSF/Motif-compatible applications. Derived & built from the original Motif 2.0 sources from the Open Software Foundation. Requires Linux 1.0 (or higher) & XFree86 2.x (or higher).

Packages include:
- Static Libraries (libXm, LibMrm & libUil)
- Header & Include Files
- Shared Library (libXm, LibMrm)

2-CD Set

On-line user's guide! Chapters include:
- Introduction to OSF/Motif
- Using Customization Features
- Using the Motif Window Manager
- Interacting with Motif Aps
- Customizing the Window Manager
- Customizing Window Apps

Demos include:
- Clipboard-cut & paster between aps
- hellomotif (button-press demo)
- periodic-a table of Motif Widgets
- textedit-a text editor
- xmpiano-a music editor example
- xmsamplers- Motif demos
- DragAndDrop - sample Drag & Drop aps (requires color screen).

Moo-Tiff for Linux.....$99.00

Webmaster Tools CD-ROM

The WebMaster Tools Series is an incredible collection of information and tools for anyone wanting to design and publish web pages, setup servers or understand the way in which the World Wide Web functions. This is a comprehensive guide to specs and techniques to dynamic sites on the Internet. Subject matter encompasses all levels of expertise, and the enormous archives on the discs will become an indispensible resource for anyone from the beginner web designer to the experienced Webmaster. An almost endless range of topics are covered in this 3 volume series. This collection is a must have for anyone who wants to build Web Pages and/or operate a Web Site.

Volume 1: Creating Web Pages — This first disk in the series covers all levels of HTML, Graphic manipulation and compression, design tips and helpful instructional material on the net itself. The archives include hundreds of shareware and freeware programs for designing web pages on Windows, Macintosh, UNIX, OS/2, & Linux. It also includes a large collection of clip art to help you jazz up your pages. Topics include:

- Site Planning
- File Organization
- CGIs
- Browsers
- Headers, footers
- Graphic Utilities
- Multi-Platform Development
- Clip Art
- Backgrounds
- Forms
- ImageMaps
- HTML Editors
- TCP/IP & Caching
- Domain Name & Registration
- Internet Terminology
- Multimedia Design
- Search Engine Behavior
- HTML Explanations
- IP addresses, TCP/IP, URLs
- Client/Server Technologies

Volume 2: Servers and Administration — Everything you need to setup an internet server on either Macintosh, PC, UNIX, & LINUX platforms, and instructional material to help get you started. We also include an archive of plug-ins, and additions that can be added to any server. Topics include:

- Web Server Software
- UNIX naming conventions
- Client/Server Technologies
- Server Side Includes
- Web Server Implementation
- Security and authentication
- Extensive URL Libraries
- File Organization
- Programming CGIs
- IP addresses
- Log Generation Utilities
- Load Distribution
- Virtual Domain Web Servers
- Form Creation Resources
- Database Integration
- Administrative Techniques

Volume 3: Advanced Technology — Everything you need to take advantage of audio and video streaming technology, as well as resources for VRML. Reflectors, compressors for quicktime, shockwave, PDF and midi to name a few, are explained in layman's terms for the advanced web developer. Then take a look into the virtual WWW and how technology today is shaping the way we will use our Internet tomorrow. This is about the future of the Web and helps you prepare for it.

Volume 1	**$35.00**
Volume 2	**$35.00**
